TO: Transportation Authority of Marin Commissioners

FROM: Dianne Steinhauser, Executive Director

RE: Data Collection for the Crossing Guard Program Contract No. C-FY05/06-001 –
Addendum 1 Agenda Item 5b

Dear Commissioners:

Executive Summary

The TAM Crossing Guard program will provide trained crossing guards for critical intersections throughout Marin. This contract addendum will provide pedestrian and traffic data collection for existing and requested crossing guard locations identified after the data collection effort in October 2005. This data will be used by the Public Works Directors and the Technical Advisory Committee to evaluate and prioritize requested crossing guard locations. Based on this information, they will recommend to the Authority additional crossing guard locations to be funded under the Crossing Guard program. **Recommendation: Staff recommends that TAM authorize the Chair to execute an addendum to the Professional Services Contract with PHA Transportation Consultants to provide additional data collection for the Crossing Guard program for an amount not-to-exceed \$19,060.**

As described in the Expenditure Plan, Strategy 4, the Crossing Guard program will fund the use of trained crossing guards for critical intersections throughout Marin County. The intersections will be prioritized by the Public Works Directors together with the Technical Advisory Committee and approved by the Authority.

In May, 2005 a survey was sent to all Marin schools and local jurisdictions requesting input on recommended locations for crossing guards.

In September 2005, the TAM Board approved a contract with PHA Transportation Consultants for pedestrian and traffic data collection and roadway characteristics information. This material was used for the evaluation and prioritization of crossing guard locations in Marin County. The traffic data included the number of pedestrians (students), traffic volume and turning movement volume. Roadway characteristics include the number of lanes and the presence of any special circumstances that would impact the safety of the pedestrians. The attached Table 1a. and b., Crossing Guard Location Evaluation Criteria, summarize the locations requested and the data from the data collection effort. The data shown with boxes meets the criteria in both AM and PM, and the data highlighted with a screened background meets the criteria for AM or PM. The TAC and MPWA recommended that these 39 locations where the data indicated the criteria are met be considered for a crossing guard. This list was presented to TAM at the February 23, 2006 meeting, and was approved to be included in a contractor solicitation for a Fall 2006 program implementation.

Making the Most of Marin County Transportation Dollars

In February, 2006 a follow up survey was sent to Marin schools and local jurisdictions to solicit additional locations for evaluation. The attached Summary Data, Crossing Guard Survey indicates the schools that have provided a response to either the March, 2005 or February, 2006 survey. The attached Crossing Guard Requests (Phase II) is a list of additional locations where data will be collected and then evaluated by MPWA and the TAC. Collection of the pedestrian and traffic data will take place during May 2006. Their recommendation will be presented to TAM for consideration and determination of the locations where additional crossing guards will be provided. These additional locations will be included in the contractor solicitation described above.

This contract addendum provides \$ 19,060 for data collection at 31 locations. Funding for the crossing guard program is included in the Expenditure Plan.

Recommendation:

Staff recommends:

1. **Staff recommends that TAM authorize the Chair to execute an addendum to the Professional Services Contract with PHA Transportation Consultants to provide data collection for the Crossing Guard program.**

Attachments:

1. Addendum to the Professional Services Contract (C-FY05/06-001) with PHA Transportation Consultants.

First ADDENDUM TO AGREEMENT C-FY05/06-001

BY AND BETWEEN THE TRANSPORTATION AUTHORITY OF MARIN AND PHA Transportation Consultants, DATED: March 30, 2006

THIS First ADDENDUM is made and entered into this 30th day of March 2006, by and between the Transportation Authority of Marin, hereinafter referred to as "TAM," and PHA Transportation Consultants, hereinafter referred to as "Contractor."

RECITALS:

WHEREAS, TAM and the Contractor entered into an agreement for School Crossing Guard Location Evaluation Criteria Data Collection dated 23 September 2005 ("Agreement"); and

WHEREAS, Exhibit A to the Agreement obligated Contractor to collect crossing guard data at 70 locations in Marin County; and

WHEREAS, the parties desire to amend the Agreement to include the collection of crossing guard data at an additional 31 locations in Marin County.

NOW, THEREFORE, the parties agree to modify Exhibits A & B as set forth below.

AGREEMENT:

1. Except as otherwise provided herein all terms and conditions of the agreement shall remain in full force and effect.
2. Updated Certificate of Insurance(s) attached hereto.
3. Exhibits A & B are hereby amended to add the following: see attachment Exhibits A & B.

IN WITNESS WHEREOF, the parties hereto have executed this First Addendum on the day first written above.

EXHIBIT A

SCOPE OF SERVICES

The following scope of service provides an outline of services that are expected to be offered in order to fulfill the First Amendment to this contract.

Task 1.0 Initial Meeting

The consultant will meet with TAM project manager to clarify the project elements including locations and schedules of data collection. This meeting will also provide the opportunity to discuss any special conditions that need to be addressed prior to collection.

Task 2.0 Data Collection and Mapping

The consultant will collect data and site features at the -- locations identified on the list included as Attachment A. These data include: vehicle counts per school hour (VT/h), pedestrian counts per school hour, and vehicle turning movements per school hour.

The pedestrian count and vehicle turning movement count will take place in the morning and afternoon, generally between 7 - 9 am and between 2 - 4 pm on Tuesdays – Thursdays. For schools that have short days on Wednesdays, the counts times will be adjusted to an earlier time frame.

The site features include traffic/pedestrian control devices (crosswalks, stop signs, and traffic signals), number of traffic lanes and a notation of special conditions that may impede the safety and/or passage of pedestrians. Examples could include, but not be limited to, excessive traffic over multiple lanes of traffic, no sidewalks, roadway construction, and deteriorated pavement.

The information shall be processed and provided to TAM in a database format and sketch format agreed upon by TAM that can be easily updated and maintained. A technical memorandum will be prepared summarizing the study procedures and findings.

Task 3.0 Project Management and Oversight

The consultant will provide project management over the course of the project.

EXHIBIT B
FEES AND PAYMENT SCHEDULE

Task 1.0 Initial Meeting

Included in project management	-
--------------------------------	---

Task 2.0 Data Collection and Mapping

2.1 Pedestrian / turning movement counts (31 locations)	\$14,260
2.2 Processing data/technical summary	\$2,400

Task3.0 Management

Management	\$2,400
------------	---------

Total Project Fees

TOTAL	\$19,060
--------------	-----------------

ADDITIONAL DIRECT COSTS

No Additional Direct Costs are included in this contract.

INVOICING

Invoicing will be based on the tasks and subtasks identified above.
